

Контрольная работа 6 класс ученик _____

1. Перечислите внутренние и внешние оболочки Земли _____

2. Перечислите формы рельефа Земли на материках и в Мировом океане

3. Что такое шкала Рихтера? _____

4. Что такое промилле? _____

5. Какая страна находится сразу и в Европе и в Азии? _____

6. Перечислите все материки _____

7. Перечислите все океаны _____

8. Напишите первые пять букв греческого алфавита _____

9. Столица Вьетнама - _____

10. Перечислите формы рельефа, обозначенные цифрами:

The image contains a central topographic map with contour lines and a river labeled 'р. Норка'. The map has several features marked with numbers 1 through 6. Surrounding the map are six diagrams illustrating different landforms, each with a dashed line indicating a cross-section. The diagrams are labeled as follows:

- 1. Гора (Mountain): A diagram showing a mountain peak with a dashed line indicating a cross-section through the peak.
- 2. Котловина (Basin): A diagram showing a basin with a dashed line indicating a cross-section through the center.
- 3. Хребет (Ridge): A diagram showing a ridge with a dashed line indicating a cross-section through the ridge.
- 4. Лощина (Gully): A diagram showing a gully with a dashed line indicating a cross-section through the gully.
- 5. Седловина (Saddle): A diagram showing a saddle between two peaks with a dashed line indicating a cross-section through the saddle.
- 6. Уступ (тер-) (Escarpment): A diagram showing a steep slope or escarpment with a dashed line indicating a cross-section through the slope.

1. _____

2. _____

3. _____

4. _____

5. _____
